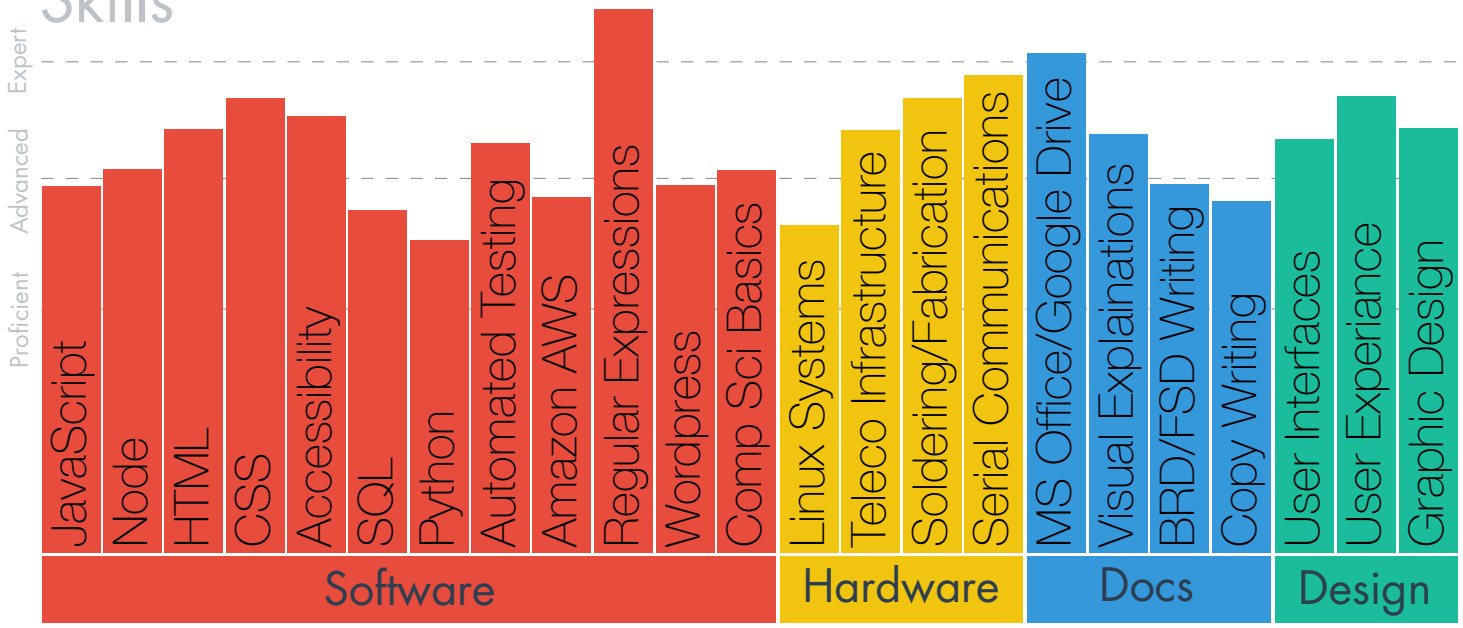
Skills



Employment

Content Engineer — macy's — 2016 to Present

Develop and design the presentation layer of Macys.com marketing and sales initiative pages, supporting a weekly release cycle. Cross-functional role requiring strong verbal and written skills to deliver the final phase of the creative release process. Ensuring brand guidelines are delivered to pixel perfection for a number of external merchants including Apple and Fitbit. Front-end heavy role focused on performance, scalability, accessibility, and SEO. Shifted focus onto removing tech debt and standardizing componentization of commonly used code patterns.

Frontend Engineer — VISA — 2015 to 2016

JavaScript Ninja using the weapons of HTML/CSS/JS to slice through the presentation tier for high traffic, consumer facing applications while thinking about site speed, user experience, product strategy, and the health of the codebase. Battling large JavaScript applications with deep knowledge of casting browser assets spells to vanquish slow site speeds, AJAX bottlenecks, and sloppy stylings. Vigilant about the latest design and development trends from tablet, mobile, HTML5, CSS3, JavaScript evolution, responsive design, accessibility, site performance, progressive enhancement, semantic markup, and cross-browser development.

Jr Developer/Designer — ECaTS Information into Insights — 2013 to 2014

Wrangling 911 lookup data from unstructured to structured data by writing complex regular expressions. Writing DML SQL scripts to deploy system configurations. Manually syncing data and configurations from production to development environments using the BCP-utility of SQL Server and Redgate SQL Data (Compare). Assessing data to measure accuracy, integrity, completeness, usefulness, and freshness using C#, Python, and SQL Server combinded with subject matter expertise (SME) of telco infrastructure, specifically the routing of 911 calls.

Technical Writer — MESTECH INTERNATIONAL — 2012 to 2013

Wrote and edited user-facing documentation using Microsoft Word and Powerpoint in accordance with DoD style guides and preferences. Photographed products using a lean-lightbox techniques and edited in Adobe Photoshop to obscure proprietary implements. Interfaced with engineers to achieve factually accurate documentation. Created HTML5-compliant computer based training using Adobe Captivate. Performed quality assurance of hardware and software products, with a focus on consistent vernacular and system labeling.

Testimonials

"Evin is an incredibly passionate and talented engineer who looks for solutions to problems rather than dwelling them.

-Brian Armstrong
Lead at Visa

"Evin and I have collaborated on multiple projects, she consistently delivers results that far exceed the expectations of the client."

-Nathan Fry
Dev Peer

"Evin is people-oriented and verbally fluent, it is these people skills that set her apart. She is great at creating enthusiasm in others!"
